Product Description

The Netis P107GS is a 4-port PoE Gigabit switch designed for small business and professional network setups. It features 4×10/100/1000M PoE ports, 1 uplink RJ45 port, and 2 uplink SFP slots for high-speed wired and fiber connectivity. With a 16G switching capacity and 2K MAC address table, it ensures stable data transmission across multiple devices. The durable metal housing and plug-and-play design make it perfect for IP cameras, access points, and network expansion in offices or commercial environments.
